

Strategic change of sales partner in Denmark

HOMAG Danmark A/S becomes new sales partner of Robert Bürkle GmbH

Freudenstadt, July 2024 - Robert Bürkle GmbH announces that after long consideration it has changed its sales partner in Denmark and the cooperation with Nicholaisen A/S has been terminated. Since June, BÜRKLE has been cooperating with HOMAG Danmark A/S in Denmark in the field of woodworking machines.

'We would like to thank our former partner for the many years of cooperation,' says Matthias Picker, Vice President Surface & Wood at Robert Bürkle GmbH. "At the same time, we are very much looking forward to working with HOMAG Danmark A/S. In HOMAG Danmark A/S, we have found a strong and experienced partner who will support us in further expanding our presence in Denmark and successfully distributing our machines and systems." HOMAG Danmark A/S is an established partner in the woodworking machinery sector and has extensive market knowledge and a strong sales network.

'We are confident that this partnership will be a success for both parties,' Picker continues. "With HOMAG Danmark A/S, we have a partner who shares our values and supports our vision for the future. We look forward to achieving new successes together and continuing to offer our customers in Denmark first-class products and services."

Robert Bürkle GmbH is optimistic about the future and is convinced that the strategic partnership will pave the way for sustainable growth and an increased market presence.

About BÜRKLE

The machine and system manufacturer BÜRKLE offers system solutions for the production and coating of various materials. Among others, furniture and wood-based materials as well as insulation boards, printed circuit boards or laminated safety glass are coated, pressed or processed on BÜRKLE technologies. BÜRKLE is the technology and market leader for highly automated press and coating systems.

The company generates annual sales of 100 million euros with around 450 employees. Worldwide, BÜRKLE is represented by 6 subsidiaries in Europe, North America as well as Asia and is represented by an international partner network in over 90 countries. Production sites are located in Germany, Hungary and China.
